

RIMAS M. ALMUNTASHIRI

Data Science & Analytics | Prospective Graduate

Jeddah, Saudi Arabia • +966 54 216 5185 • rmsmunti3@gmail.com • linkedin.com/in/rmsmunti • github.com/rmsmunti3 • rmsmunti3.github.io

PROFESSIONAL SUMMARY

Results-driven Data Science senior at the University of Jeddah with practical expertise in machine learning workflows, predictive modeling, and executive business intelligence. Completed a clinical data analytics internship at East Jeddah Hospital, earning an official recommendation letter from the Head of Statistics. Proficient in Python, SQL, R, and Power BI, with hands-on experience handling datasets exceeding 1,000,000 records. Seeking entry-level Data Science and Analytics opportunities to deliver measurable business impact.

EDUCATION

Bachelor of Science in Data Science & Analytics

University of Jeddah — College of Computer Science & Engineering

Expected 2027

Jeddah, Saudi Arabia

PROFESSIONAL EXPERIENCE

Data Analytics & Statistics Intern

June 2026 – August 2026

East Jeddah Hospital (Hospital Statistics Department)

Jeddah, Saudi Arabia

- Audited, cleaned, and processed electronic clinical datasets to ensure healthcare data governance and reporting accuracy.
- Calculated key operational indicators, including bed turnover rates and patient length of stay, to optimize resource allocation.
- Engineered automated data summaries and visualizations to accelerate monthly executive hospital administrative reports.
- Awarded an official recommendation letter by the Head of Hospital Statistics for analytical precision and dedication.

KEY TECHNICAL PROJECTS

Smoker Status Prediction from Health Insurance Records | ML

Python, Scikit-learn

- Preprocessed a 1,000,000-record dataset, successfully imputing over 501,000 missing values without data leakage.
- Benchmarked Logistic Regression, multi-kernel SVMs, and Random Forest; selected Random Forest (80.79% accuracy, 81.26% recall).
- Extracted entropy feature importances, confirming insurance charges, BMI, and age as the primary predictive drivers.

Credit Card Fraud Detection & Decision Engine | BI & ML

Power BI, Power Query, RapidMiner

- Engineered ETL pipelines in Power Query and built an executive Power BI dashboard analyzing 284,807 European card transactions.
- Identified temporal fraud spikes across \$60.13K in direct losses, evaluating model behavior under extreme class imbalance.
- Formulated an automated 3-tier prescriptive engine (Auto-Block, MFA, Auto-Approve) based on predictive confidence thresholds.

Detecting Fake Influencers via Multi-Layer Forensics | Social Web

Python, NLP, Network Analytics

- Built a 4-layer audit architecture (Text/NLP, Action, Network, Hyperlink) analyzing 1,773 accounts across Instagram and X.
- Empirically proved that isolated surface metrics fail to catch automated bot activity, establishing a multi-layer scoring model.

2020 US Air Quality & Ozone Pollution Dashboard | BI Visualization

Power BI, DAX, Spatial Maps

- Developed an interactive Power BI spatial dashboard visualizing US EPA daily monitoring stations across counties.
- Validated seasonal ozone concentration curves and established linear correlation models between average ozone and Maximum AQI.

LICENSES & CERTIFICATIONS

- HCIA - Artificial Intelligence V4.0 — Huawei ICT Academy (ID: ICT20260807009578)
- HCIA - Big Data V3.5 — Huawei ICT Academy (ID: EBG20260714000065)
- openGauss Database Technology & Applications — Huawei ICT Academy (ID: ICT20260731000026)
- Algorithm and Program Design — Huawei ICT Academy (ID: ICT20260810000469)
- Information Representation & Data Organization — Huawei ICT Academy (ID: ICT20260723000083)
- Mathematics for Machine Learning (Linear Algebra, Calculus, Statistics) — DeepLearning.AI
- Python Basics — University of Michigan / Coursera (ID: APAT06YXIWLQ)
- AI & Mathematics Foundations — KAUST Academy / Coursera (ID: pc84b7YbqHKvOG-2GxISQQ)

TECHNICAL SKILLS

Languages & DBs: Python (Pandas, NumPy, Scikit-learn), SQL, R, Java, MySQL, MongoDB, Neo4j, openGauss.

BI & Analytics: Power BI (Power Query, DAX), Tableau, Advanced Excel, RapidMiner Studio, Predictive Modeling.

Methodologies: Machine Learning Pipelines, Feature Engineering, ETL Processing, Quantitative & Statistical Modeling.

LANGUAGES

Arabic: Native Proficiency

English: Professional Working Proficiency (Fluent)
